# WEATHER OF CONCERN

## Weather of Concern

- Dry and gusty offshore winds will impact the North Bay Mountains and East Bay Hills as well resulting in critical fire weather conditions
- **Active Weather Warnings, Watches and Advisories by County:**
- <https://alerts-v2.weather.gov/counties/CA>

# **WEATHER SYNOPSIS BY REGION**

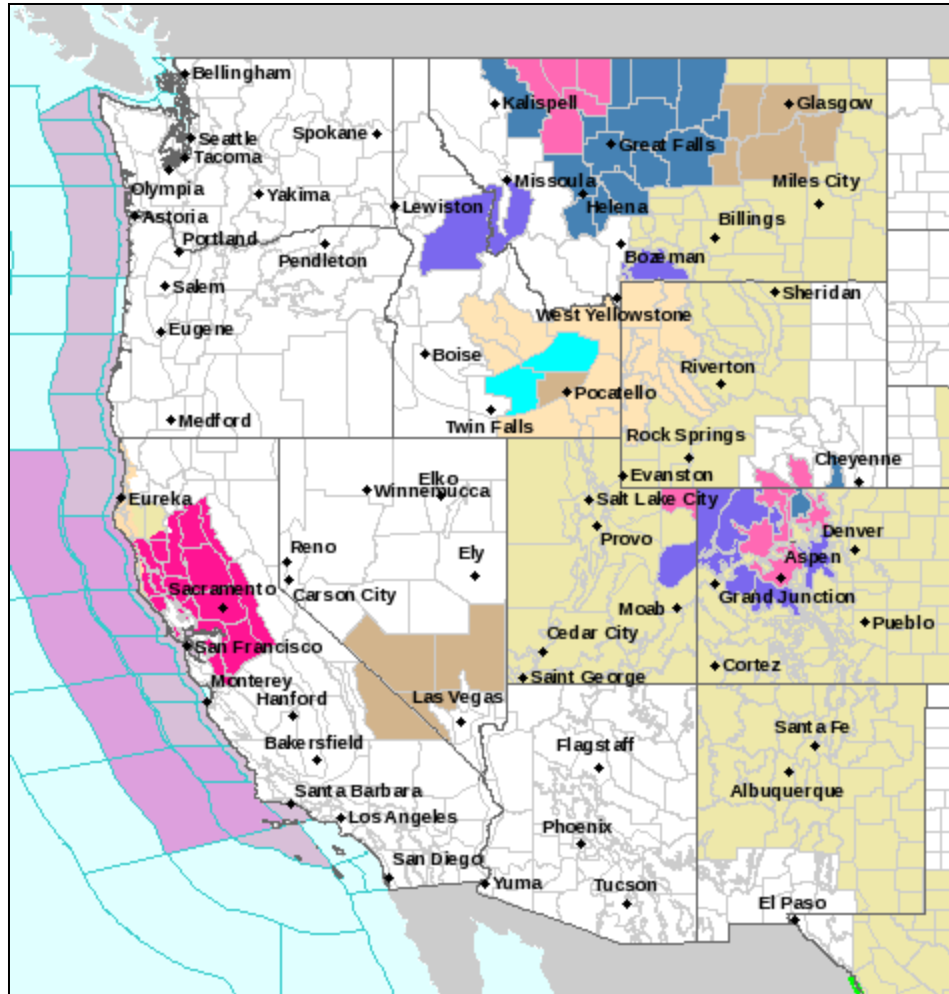

## **NORTHERN CALIFORNIA**

Skies are mostly clear across interior Northern California with only some areas of clouds lingering over the mountains in the wake of the passage of the trough. Current temperatures range from the mid 30s in the mountain valleys to the mid 50s and lower 60s in the Central Valley. Broad long-wave trough over the West will bring a cooling trend to region early next week. Max temps will be cooling to within a few degrees of average.

## **SOUTHERN CALIFORNIA**

A low pressure system developing over the interior western states will bring stronger onshore flow with periods of gusty west winds in the mountains and deserts. Deepening of the marine layer with night and morning coastal low clouds and fog extending farther into the valleys and a cooling trend into Monday. This will be followed by a warming trend into next weekend with locally gusty northeast winds possible near the coastal foothills on Friday and Saturday.
